

TYPE VARIO

Sampling System

DN 15 - 100 / PN 10 - 100

NPS ½" - 4" / class 150 - 600

Liquids

7.2

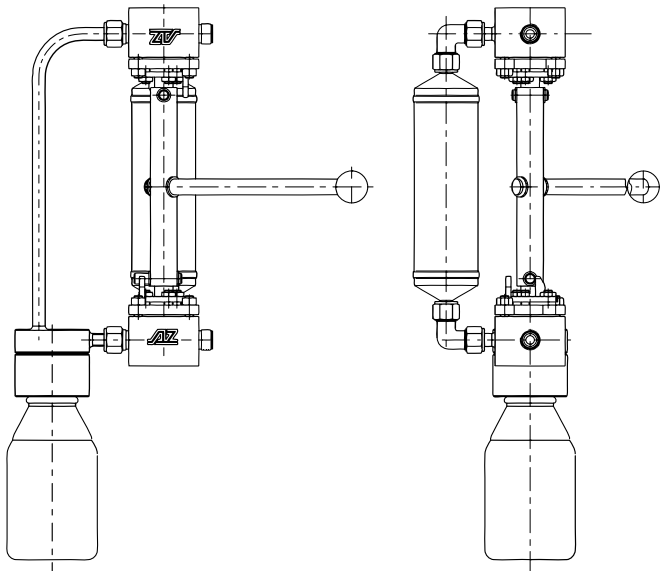

- closed system
- cavity free
- free definable representative sample quantity
- pressure free sampling (positive overlap)
- spilling eliminated and contamination free
- simple and safe operation
- absolutely tight
- compact design
- multiple sampler combined

TYPE VARIO

Capability characteristics

Due to the integrated stainless steel sample container it is now possible to take **larger absolute representative** sample quantities. The quantities are exactly defined by the size of the sample container. The type **VARIO** is available in 2 different designs (VARIO and VARIO G2) and both of these can be provided with 2 different bottle systems (**Type A and B**).

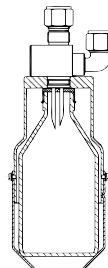

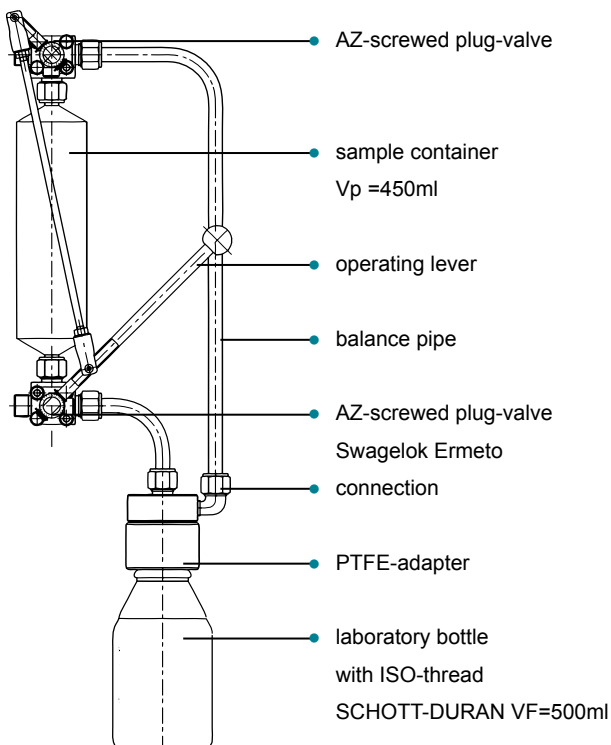

VARIO G2 B PN40/100

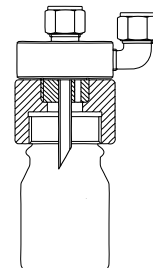

Features VARIO

- cast limit stops (G2)
- solid coupling between the screwed plug-valves (G2)
- also available with actuator (G2)
- special sealing on request (G2)
- compact design
- closed system
- free definable sample quantity
- heating jacket on request

VARIO B PN25

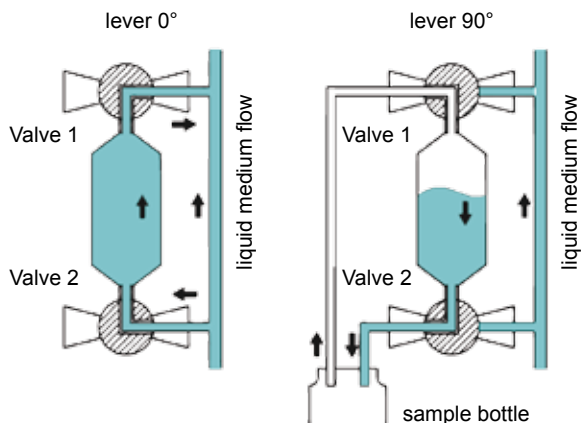

Type A
with needle-system

Type B
with PTFE-adaptor
for laboratory-bottle

Function Scheme

Order Example:

Type VARIO-G2-B-DN8-PN40-1.4571 VP=450ml VF=500ml
VARIO G2 = type of sampling design, B = bottle system,
DN8 = size, PN40 = rating, 1.4571 = body material,
VF 450ml = sample quantity, VP 500ml = bottle volume
