

Druck-Temperatur-Diagramm Hochleistungsklappe Serie HG Pressure-temp. range diagram high performance butterfly valve series HG

Metall Sitz:
 Temperatur: > 280 °C
 Leckrate: DIN 3230-BO > 2
 EN 12266-P12 > B

Metal seat:
 Temperature: > 280 °C
 Seat Leakage: DIN 3230-BO > 2
 EN 12266-P12 > B

Bei Einsatz von PEEK oder POM Sitzringen gegen die empfohlene Druckrichtung beträgt der maximale Differenzdruck 5 bar.

The maximum differential pressure for PEEK or POM seats is 5 bar if the valve is used against the recommended flow direction.
